SIZE: 9"/230mm
COLOUR RANGE: Ivory
CARTON SIZE: Twelve
FEATURES: 3 cavity, High Heat Suitable, dishwasher safe

INSULATED

Our insulated tableware offers a combination of style, performance and functionality you won't find anywhere else. Designed with thoughtful features like nested fit stacking and ergonomic handles, our insulated tableware saves space in your kitchen and makes tray assembly faster and easier. Unlike others, our insulated products are fully foam insulated, which means your patient meals are always served at the ideal temperature. The ergonomic features and attractive styling of our mugs, bowls and domes provide a pleasurable dining experience

HEAT ON DEMAND® 2

Heat On Demand 2 Plus is the next evolution of our proven Heat on Demand® 2 induction-heated meal delivery system. Heat On Demand 2 Plus offers a combination of quality, performance, features, and efficiencies that other economy-class induction systems can't match! After a brief 19-second activation cycle, bases begin to transfer heat thoroughly and consistently, keeping food temperatures at or above 60°C for 45+ minutes. Great for smaller hospitals and senior living facilities with shorter meal assembly lines.

INSULMAX™

Aladdin Temp-Rite's InsulMax™ is a pellet base system consisting of a plastic pellet base that is heated in a specially designed convection air base heater. When the base is heated for two hours and used in conjunction with a heated dish and insulated dome, hot food temperatures will be maintained for up to 40 minutes. InsulMax's advanced heat-retention capability results from using a temperature storage material which can be heated to a high temperature with a gradual release of heat over an extended time period. That is second to none.

HEAT ON DEMAND ADVANTAGE®

A revolutionary innovation. Its breakthrough induction technology gives you features, performance, and efficiencies no other meal delivery system can offer. For foodservice operations with extended hold time needs, Aladdin Heat on Demand Advantage® systems induction meal delivery systems have been designed for use with a heat plate to extend the hot hold time. After activation, the Heat on Advantage bases thoroughly and consistently transfer heat to the dish and food. Providing extended hot food holding while maintaining high-quality food. Keep food at or above 60°C for 60+ minutes with a heated plate.
