INDUCTION. THE POWER OF TOMORROW.

THE COOKING
WORLD IS
LOOKING TO
**INDUCTION
TECHNOLOGY**
AS THE
FUTURE
FOR SAFER,
GREENER
FOOD SERVICE
OPERATIONS.

THE ENVIRONMENT

If it's not sustainable, why do it?

At Moffat, we aim to inspire chefs, bakers, and cooks to create a more sustainable world by equipping them with the best tools powered by renewable energy.

As innovators of world class cooking technology, we've taken up the challenge to reduce the environmental consequences of what we do. It's an evolving process of reducing our carbon footprint that's as much about elevating the performance and longevity of these products as it is about how they are made, packaged, delivered.

We are lucky that the heart of our operation is powered by renewable energy. The majority of electricity supplied to Moffat's New Zealand manufacturing facility in Christchurch is generated from hydroelectric power stations on South Island dams. These hydro dams are replenished by rainfall to provide a natural energy source with significantly lower greenhouse gas emissions than any fossil fuelled power alternative.

Our efforts to lift environmental performance are ongoing as we develop new processes and technology. At the same time, we encourage food service professionals to reduce their own carbon footprints by making the transition to more sustainable electric platforms.

Built to last.

Waldorf units are finished in heavy gauge 304 grade stainless steel. Fully framed doors incorporate a new heavy-duty hinge system and our ranges are all built on a galvanised steel chassis. The superb finishing that has become a hallmark of Waldorf products includes fully welded seams and bullnoses, and polished stainless-steel surfaces.

Hygiene made easier.

Rounded corners and edges (internal and external) and streamlined top surfaces make for effortless cleaning and wiping down of an entire Waldorf cooking line.

Service on the fly.

Waldorf design allows each unit to be serviced and maintained in situ, minimising the need to remove it or shut down an entire cooking line.

Make a Bold choice.

The Waldorf Bold Range is for chefs wanting to make a statement by adding some colour to their world. It's available in three vitreous enamel colours: black, burgundy, and chilli red. Vitreous enamel is highly resistant to wear and tear and will retain its colour for the life of the unit. Waldorf cabinet base doors are also available in Bold colours.

MORE INDUCTION OPTIONS.

Induction Cooktops 450mm and 900mm

The expanded line-up of Waldorf induction cooktops was conceived to meet a growing demand for more options in how this powerful technology is applied.

Construction delivers typical Waldorf styling and functionality that includes a heavy-duty 6mm ceramic glass glide top and powerful new 5.0kW variable heat zones that deliver more power and precision than ever before. Auto pan detection saves energy and makes for a cooler working environment by turning off the heat when pans are removed.

Various configurations of cooktop are available in 450mm and 900mm widths with round and full area induction zones. Cooktops can be supplied with suite matching modular cabinet bases with doors and adjustable feet as standard.

Induction Cooktop Standard Features

- Heavy-duty construction
- Automatic pan detection switches the induction zone off when a pan is removed
- 3 models of base unit
- Stainless steel exterior
- Fully modular
- Easy clean, installation and service

MEET OUR NEW HEAD OF THE FAMILY.

Induction Range Convection Oven 900mm

For the first time, Waldorf has introduced the 900mm Induction Range with Convection Oven – a veritable powerhouse that food service professionals have long been waiting for.

The new 800 Series Induction Range combines the space saving design of Waldorf induction technology with the refined looks and time-tested dependability of our convection oven line-up.

Up top, you have a choice of various combinations of four full area or round cooking zones in 3.5kW or 5kW.

The electronic components of the induction cooktop are housed within the unit itself which means there's no compromise on space down below where a full size 6.1kW 2/1 GN convection oven completes the package.

Induction Range Standard Features

- Heavy-duty construction
- Four Induction zones
- Automatic pan detection switches the induction zone off when a pan is removed
- GN 2/1 6.1kW electric convection oven
- Dual oven circulation fans
- Drop down door
- Stainless steel exterior
- Fully modular
- Easy clean, installation and service

A FUSION OF TRADITIONS

Induction Wok 450mm

Designed for smaller scale food service applications, the Induction Wok brings an Asian influence to western style cooking without the extra cost of an extraction system.

Available in 3.5kW and 5.0kW with a choice of bench mount, cabinet base, or leg stand.

Induction Wok Standard Features

- Heavy-duty construction
- 300mm round induction wok 3.5kW or 5kW models
- Automatic pan detection switches the induction zone off when wok pan removed
- 3 models of base unit
- Stainless steel exterior
- Fully modular
- Easy clean, installation and service
